#### A. GUIDELINES FOR INTERPRETING THE REPORT

The teacher evaluation report is for developmental purposes and is meant to help identify strengths and areas for improvement. Please consider the following recommendations that will aid in interpreting the results:

- 1. Examine the report by taking note of patterns in order to consider how best to act on the feedback your students have taken the time to provide. Use the reflection section at the end to reflect upon how you might act on the feedback.
- 2. These evaluations stem from student perception and thus constitute one source of evidence among others as to the quality of your teaching. Any response to the feedback should be based on the most representative results rather than on outlying responses.
- 3. Upon getting a general sense as to what has gone well, and which areas may require attention and improvement, it is important to drill down to the related questions. These questions can help guide future action if feedback from students suggest areas for improvement.
- 4. Keep both the likert scale and written comments in mind while reading through the report. High scores (4+) suggest student consensus indicating a strength. On the other hand, low scores (2-) should be considered as an area that requires immediate developmental focus based on student feedback.

#### **B. NOMINATION FOR TEACHING AWARDS**

	Response Count
I would like to nominate BERNARD TEO ZHI YI for teaching awards	7

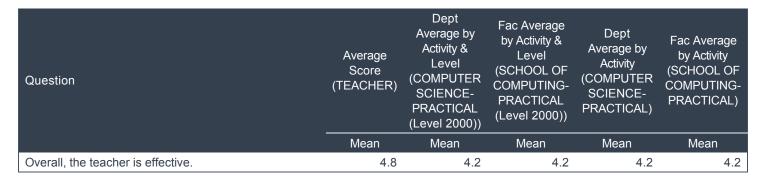

#### Comment

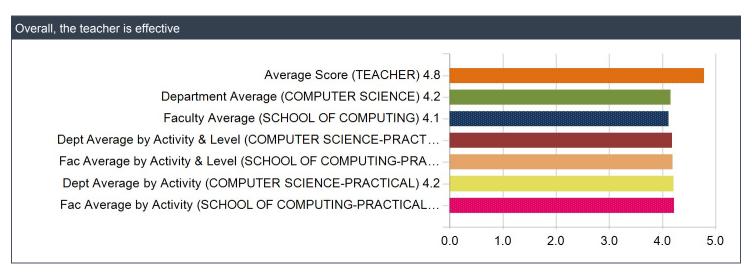

- Very effective tutor
- Goes out of his way and even create powerpoint slides for each tutorial/lab session. It is a pity that I am not in his tutorial class, as I believe he can teach very well
- He's good
- He put in expended effort to prepare materials for us and gave us individual comments on our code.
- Very timely feedback on questions raised. Clear in teaching and knowledgeable with this subject matter
- He is good
- Does everything very well, including writing extra test cases to ensure that one of our weekly lab assignments is of sufficient rigour.
